

A scatter plot showing the relationship between 'Subject' (X-axis) and 'Anomaly' (Y-axis). The X-axis ranges from 100,000 to 850,000. The Y-axis ranges from 0 to 1.0. The plot contains two data series: 'Anomaly' (blue dots) and 'Standard' (orange dots). The 'Anomaly' series shows a dense cluster of points at low Subject values (100,000 to 250,000) with high Y-values (0.7 to 1.0). As Subject increases, the Y-values for 'Anomaly' generally decrease, with some outliers. The 'Standard' series consists of a few points at low Subject values (100,000 to 250,000) with low Y-values (0.1 to 0.2).
